

Please do not repeal New Jersey's do not call list. As a working mother I deeply resented all the telemarketers calls each night that I had to deal with when I only had a limited time with my family. Since the passage of the do not call list the evenings in my household have been very peaceful. I will never do business with any company that solicits by telephone or donate to any charity that raises funds by phone. This law helps American families. I request that you keep the laws in place. Thank you
Leslie Walch
